

# Charmed Ring Necklace

This charming necklace is quick, easy and right in style. We love projects like this when you need a quick last minute gift.

## Materials

- 1 Large Soldered Ring
- 1 Briolette
- 1 1/2 foot Sterling Silver Chain
- 2 Charms
- 5 4mm Sterling Silver Beads
- 2 Jumpings
- 1 Headpin
- 18" 24 guage Wire

## Tools

- Round Nose Plier
- Chain Nose Plier
- Wire Cutter

## Step One

Cut 3" of chain, thread through ring, and add a charm to each end of the chain, cut the remaining chain in half and set aside.

## Step Three

With 6" of 24g wire wrap the briolette and slip in the soldered ring before closing.

See Page Three for Broillette wrapping instructions

#### **Step Four**

Cut 4 3" pieces of 24g wire, and wrap one to each end of the chain.

#### **Step Five**

Add a 4mm bead to each of the wires and wrap 2 to the ring and the other 2 to the clasp.

You now have a very stylish necklace that can be personalized by the Charms and Beads that you choose.

# Broilette Wrapping Instructions

## Step One

Cut 6" of wire for each broilette.

## Step Two

Thread bead onto wire so that 1/2" is on one side and the other 5 1/2" is on the other side

## Step Three

Bend both wires up to form a triangle

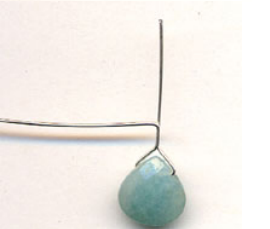

## Step Four

Be sure bead is centered, pinch wires with the chain nose pliers so both wires are pointed straight up from the pointed tip of the bead

## Step Five

With the chain nose plier bend the long wire to a right angle about 1/8" over the bead.

## Step Six

Use the wire cutters to trim the short wire to the point where the long wire bends over.

## Step Seven

Use the round nose plier to create a loop above the bead, to do this, place the round nose plier so the jaw is above the wire and use your thumb to bend the wire up and around the plier until you bring the wire back to a right angle. Be sure to rotate the plier 1/4 turn while forming the loop to create a perfectly rounded loop. Remember the tool is merely the form you are using to shape the wire, you control it with your fingers in a push and pull motion.

## Step Eight

Add ring and close the loop by wrapping the long wire over the two wires starting at the base of the loop and working toward the tip of the bead. Trim excess wire and carefully tuck the tip of the wire down.
